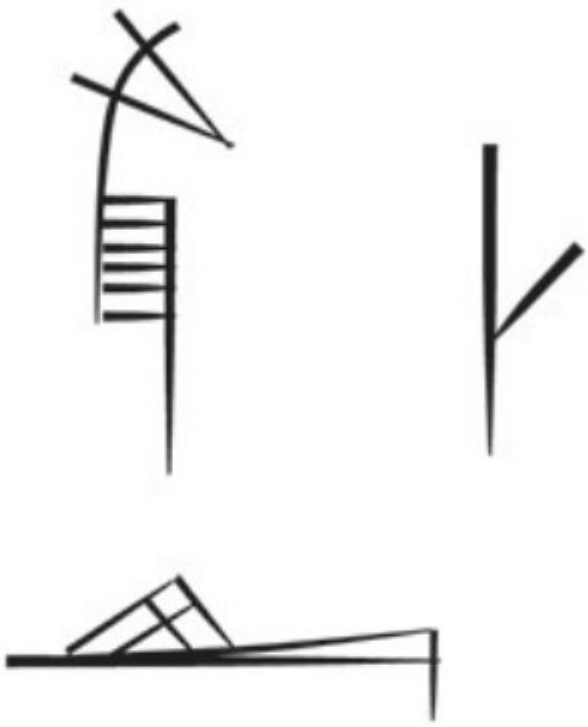
This is a section of the “Butterfly Stone” from the Ness of Brodgar. There four characters, which are uncanny similar to archaic-Cuneiform of the same time.

The first image shows an animal-shape feature.

This is the Sumerian archaic cuneiform character “Apin”.

The second feature compare with the archaic cuneiform character “pap”.

The third feature resembles the archaic cuneiform character “uri”.



If we read them as their archaic cuneiform “doublegangers”. The Brodgar reads as “Apin-pap-Uri”.
